General Instructions

The following edit/data checks are run on the agency and school data files. The record layouts can be found in Appendices 1 - 4.

These edits should be run on the data file(s) before the state sends them to Census. This will insure both the file format and the data are as accurate as possible.

Name convention:

The CCD field mnemonics are used where possible and can be found in the CCD Instruction Manual. CY refers to the current year and PY refers to the prior year. If CY is not in front of a field name then it is assumed to be a current year value.

The abbreviation TOT(PK - AL) means fields; TOTPK, TOTKG, TOT01, TOT02, TOT03, TOT04, TOT05, TOT06, TOT07, TOT08, TOT09, TOT10, TOT11, TOT12, TOTUG, and/or TOTAL.

The abbreviation "abs" means absolute value when used in calculations.

Data Values:

Depending on the type of file sent, numeric fields can be reported as -1 for "M", -2 for "N", or -3 for Blank or null. These edits are written to check for all of these possibilities.

Edit Names:

Edits which have "Invalid" in the name must be corrected before the file(s) can be processed and have "**Must be corrected**" to the right of the edit name. Edits which have "change" in the name, are matching current year to prior year and should be verified for data accuracy.

Reporting Null or Blank for a data field:

NCES does not allow null or blank to be reported for any data item with the exception of:

LEAID - only for a new/added agency.	LCITY - only if the same as MCITY
SCHNO - only for a new/added school.	LSTATE - only if the same as MCITY
MZIP4	LZIP - only if the same as MZIP
LSTREE - only if the same as MSTREE	LZIP4

NCES has statistical standards which must be followed when publishing national totals, and states that do not report an entire data item stand in the way of NCES presenting national totals. If the data exists but the value is not known then enter "M" for missing. If a data item is a combination of reported values and "M", we will ask you about the "M's". NCES standards dictate a certain cell size for reporting state totals so the fewer "M's" in a data item the better.

Reporting all records with Null, Blank, "N" or "M" for a data field:

A state can not report null or blank for an entire data item. If the data item does not apply to your state then enter "N" for not applicable. If the data exists but the value is not known then enter "M" for missing. If an entire data item is reported missing we will ask you to confirm this with us. Most data items are reported by all states so we need confirmation from you that your state can not provide the information.

If an entire data item is reported as not applicable, "N", we will ask you to confirm this with us as well.

Edits exclude closed/inactive agencies (BOUND = 2 or 6) and new agencies not yet open (BOUND = 7) unless otherwise noted.
